SUMMARY

Software developer with one year at EduvanceAI delivering production backend and full-stack applications using FastAPI, Node.js, TypeScript, React, and PostgreSQL. Built data tooling for 130K+ records, multi-tenant systems across five client organizations, and streaming agentic workflow APIs, with strong production debugging and deployment experience.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL
Backend: FastAPI, Node.js, Express, Bun, REST APIs, Server-Sent Events, Zod, OpenAI API
Frontend: React, Next.js, TanStack Query, Tanstack Start, TanStack Router, TanStack Table, React Hook Form, Tailwind CSS, Vite
Databases: PostgreSQL, multi-tenant schema design, query optimization, CTEs, schema migrations
Cloud and DevOps: AWS (Lambda, ECR, EC2, S3, Amplify, CloudTrail), GCP Cloud Run, Docker, Vercel, CI/CD

PROFESSIONAL EXPERIENCE

Junior Software Developer, EduvanceAI **Mumbai, India | Aug 2025 – Present**

Workflow Console – Agentic Operations Workflow Platform

- Designed a job-based API in Bun, TypeScript, and Express for **six agentic workflows**, using Server-Sent Events for live updates, Zod-validated contracts, and retained job state to support reconnection after dropped streams.
- Extended the platform with HR interview scheduling, leave-policy validation, and annual-report proofreading, restricting OpenAI to narrow interpretive steps such as resume scoring and prose review while validating a **27K-row** leave dataset and report figures in deterministic TypeScript.
- Built the React console with live progress streaming, shareable workflow URLs, and validated forms using TanStack Router and React Hook Form, then added automated tests with Vitest and Mock Service Worker.
- Owned development and deployment from API design through **AWS Lambda release**, containerizing the service with Docker, publishing images to Amazon ECR, and deploying the console on Vercel.

Sales Copilot – Field Sales Automation Platform (HR Johnson)

- Built server-side pagination for a **130K+ record dataset** supporting 70 client super users, keeping page payloads near 6.4 KB and response times around **190 ms**.
- Delivered **8 admin data-management pages in 3 weeks**, creating reusable table, modal, and form components that reduced the implementation files required per page by **~60%**.
- Introduced structured logging across API endpoints and rebuilt the log export with IST-converted timestamps, then traced session records to an authentication defect affecting active users and **resolved it the same day**.
- Developed an Excel validation engine for schedule uploads that compares incoming data against existing records and flags unintended edits to historical entries with cell-level error annotations.
- Implemented a persona-aware Order Collection Pitch module in React for **5 dealer personas**, integrating recommendation APIs with client-side caching and responsive multi-tab product journeys.

Multi-Tenant Learning Management System

- Designed database isolation across **5 client organizations**, provisioning separate PostgreSQL databases, migrating schemas, and introducing a reusable organization-routing hook across **35+ frontend files**.
- Identified and patched a security vulnerability that exposed deletion authorization codes in API responses, releasing the fix **within hours**.
- Replaced a static reporting template with a dynamic Admin Report engine and optimized its SQL using CTEs, eliminating manual report compilation and reducing query execution time by **~35%**.
- Developed the Hindi chatbot pipeline while preserving the existing English flow, rewriting **6 affected APIs** and fixing a scoring defect that crashed conversations.
- Independently built and deployed a Project Engineer Interview Chatbot in **under 2 weeks** (React on Vercel, Python on GCP Cloud Run), implementing LLM-based response scoring and single-attempt enforcement before demonstrating it to McKinsey stakeholders.

Web Developer Intern, Rabs Net Solutions Pvt Ltd **Mumbai, India | Apr 2025 – Aug 2025**

- Developed REST APIs with Node.js and Express for a production CRM and resolved client-reported defects across active deployments.

EDUCATION

M.Sc. Information Technology, Sathaye College	2022 – 2024
B.Sc. Information Technology, Raheja College of Arts and Commerce	2019 – 2022
